

New Wrist-Assist Accommodates Larger Hands

R.S. Innovations has introduced a new version of the Wrist-Assist with a larger cushion. The Wrist-Assist was originally developed by nail tech Robin Stopper Renner to ease repetitive strain issues associated with working in the nail industry. This larger version was created to accommodate technicians with larger hands and to give that extra boost to clients' hands. When used horizontally, it supports the bottom of the client's wrist at a 2-1/8" height and moves with the client's wrist for optimum placement and flexibility. When used vertically, it supports the client's hand at a height of 6". This unique design promotes a healthy working position by improving technician's posture and relieving muscle fatigue.

DNA Nail Polish Targets Health-Conscious Consumers

G2 Organics' new DNA Nail Polish is odorless, 95% organic, and there's no need for a top coat or a base coat. "Reiki-charged" to make the wearer feel good and attract positive energy, these hand-mixed polishes come in three colors, including dark (D), neutral (N), and alchemy (A). Dark is a rich, bold black that can be worn alone or layered. Neutral

is a natural, pale pink that borders on white, and Alchemy is a dark purple with a slight shimmering sparkle. For quick fixes on the go, each polish comes with a Side-kick — a miniature polish vial with a brush.

A portion of the proceeds from DNA Nail Polish goes to cancer research. For more information, go to www.nailsmag.com/fifi/18451.

RadaPro Introduces Ergonomic Pedicure File

New from RadaPro, the Ergonomic Pedicure File relieves wrist strain and promotes good salon hygiene. Ergonomically designed to fit comfortably in the palm of the hand and reduce pressure on the wrist, the file features removable self-adhesive abrasive stickers that allow the tech to start fresh with each pedicure. Coarse abrasive stickers can be used to remove calluses from clients' dry skin or after soaking and callus-softening applications. Fine abrasive stickers can be used for finishing and buffing. Extra stickers tuck conveniently inside the file. **IN**
