FOR IMMEDIATE RELEASE

NEWLY DESIGNED WRIST-ASSIST!

Mount Dora, FL – March 24, 2012 – R.S. Innovations, LLC, has redesigned the wrist-assist tool with threaded end discs. This design improvement allows for interchangeable cushion sizes and cushion replacement. A kit containing both the original and large size cushion is now available. The wrist-assist hand support tool elevates and holds the client's hand and arm, reducing technician strain. It can be used horizontally or vertically to achieve desired support height. This unique design improves technician's posture and relieves muscle fatigue.

The wrist-assist was developed to ease repetitive strain issues associated with the working environment of the nail industry. More information on the wrist-assist can be found at www.wrist-assist.com.
